I respectfully urge the FCC to reject NAB's petition 04-160. I am a truck driver and I travel many states. I have found XM Radio's Instant Traffic and weather to be of great value to me. I get current weather reports which is a help to me in winter or any kind of weather that will affect road conditions. As far as Instant Traffic, this helps me avoid areas where there has been an accident, congested traffic or road construction. This helps traffic flow because I can avoid the problem area and not become part of the problem. It saves me time so that I can deliver my freight on time and not be sitting in traffic.

I paid good money for my XM Radio and continue to pay a monthly service fee. This is a wonderful service that is not available from regular radio stations. This service is a must for anyone who travels.
